Preparing for the winter rains

Workmen last week installed the concrete lining to the new channel along San Tomas Aquino creek near Crockett. This is the site of heavy damage to nearby homes early this year when storm waters washed away large portions of the creekbed. Press staff writer Pat Safford begins a two-part series in this issue about the capital improvements scheduled for Campbell by the county flood control district. See page 4.

$800,000 facility

Planning commission approves plans for new Campbell library building

PLANS FOR CAMPBELL's new $800,000 library building, to be located across from the city hall between Central and Harrison, were approved by the planning commission on Monday night.

If the construction "market is right", bids for the structure will go out on Aug. 27, according to Bill Hedley, architect, who presented the plans to the commission.

The planning commission specified that a fire sprinkler system be added, if the city council approved, for the only major change in the plans that were presented.

The building will have 24,000 square feet and will be leased by the city to the county library system. It is estimated that the library will have a book capacity of 90,000 volumes and seating for about 200 persons.

As an "add-on" alternative, the city council is expected to use revenue-sharing funds to a community meeting room in the library estimated to cost $25,000. During budget discussions, the council indicated that the room would be built.

Plans for a 50-unit motel, the first in Campbell, were approved by the planning commission on Monday. Surber-Greenley submitted the application for property at 1210 Camden.

APPLICATIONS FOR TWO signs, one free standing at San Tomas expressway and Budd for La Valencia and the other for the Age of Aquarius for temporary ones at 540 W. Latimer avenue were approved while the application of Carpeteria for a free standing pole sign at their new building at 423 East Latimer was continued for two weeks.

Two industrial buildings on Dell avenue received the approval of the planning commission, one for C.J. Toy at 1150 and the other for W.A. Horne at 1550.

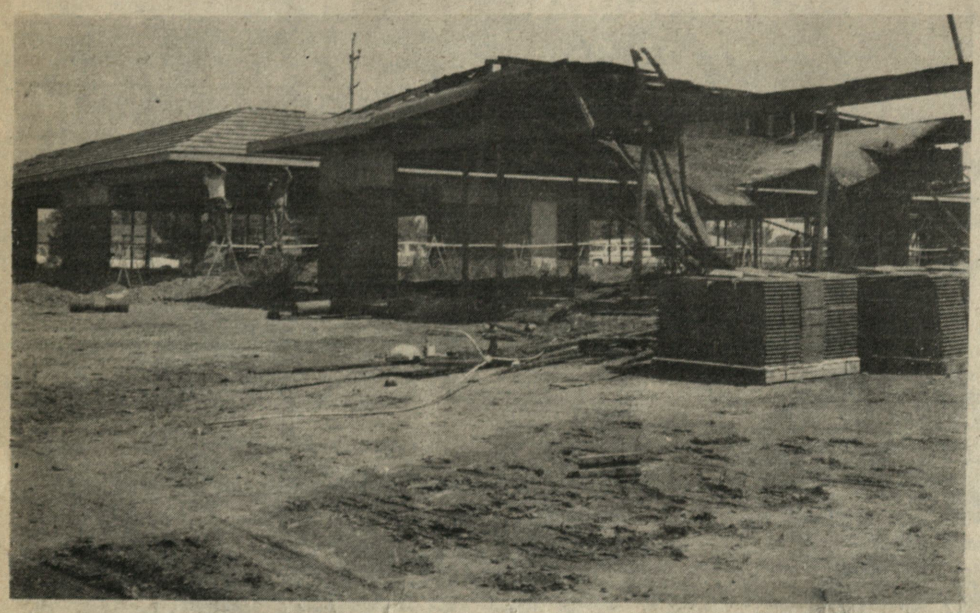
Side yard variances were granted Dura Style Homes for corner lots in the Rancho del Prado tract and the tentative parcel map for property on La Pradera drive was approved as submitted by Glen Gore.

The commission continued action on the application of SHARE for a commercial-residential development at 591 W. Hamilton ave. and also on the application of Dr. John Hughes for a zone change from R-1 to either P-O (professional office) or C-1-S (commercial) on properties at 44, 45 and 58 Rosemary.

THE HEARING ON THE P-D (planned development) zoning at 109 and 117 Dillon avenue for an industrial building as submitted by Eddie Anderson was also continued.

In a matter referred from the city council, the commissioners directed staff to develop an interim zoning district in the area bounded by Hamilton avenue, Winchester boulevard, Kennedy avenue and Highway 17, with special emphasis on the downtown core.

The council directive was based on pending developments involved with the proposed downtown loop system.



TRAFFIC ALONG Hamilton ave., west of Highway 17, came to a standstill Sunday evening as firemen battled a blaze in the office complex under construction at Third and Hamilton. One wing of the complex was gutted by the blaze, shortly after 7 p.m. Sunday, and roofs at three nearby apartment buildings were scorched. According to Campbell fire chief Gene Gordon, the fire is believed to have been set by children playing with matches. Residents of the adjacent apartment building reported seeing three youngsters run from the structure shortly before the fire was discovered.

Council gets scout hall report

Although setting the tax rate and adopting the final budget for the fiscal year will highlight Monday's council session, the proposed agreement for leasing the old engineering building or "scout hall" to the West Valley hiking club is expected to create considerable interest.

Other items on the agenda include a return engagement of the fire hydrant problem.

Dennis Bennett, of 847 Sunnypark court, protested the location of the hydrant in his front lawn six inches from his driveway. The council directed staff to see if it could be moved as a practical matter. The staff report will be on the agenda.

Action due Monday

Council will cut city tax rate by 18 cents

CAMPBELL'S TAX RATE for the fiscal year 1973-74 will be cut 18 cents from last year, the city council "unofficially" indicated Monday night after a five hour final budget study session.

The official action on the tax reduction will take place next Monday, Aug. 27, when the budget for the fiscal year will be adopted and the tax rate set.

It is expected that the tax rate for the operation budget will be set at $1.18 per $100 assessed valuation as compared to $1.30 for the past year, a drop of 12 cents.

The rate for the bond issue redemption will be 50 cents per $100 assessed valuation compared to 56 cents last year, a reduction of six cents.

The Campbell Lighting district rate will remain at 13 cents per $100 assessed valuation.

The total tax then for the city for the fiscal year then is expected to be $1.81 per $100 assessed valuation as compared to $1.99 last year.

DURING THE FIVE HOUR study session on Monday, the council made a number of major decisions affecting capital improvements, personnel and equipment.

Based on the recommendation of City Manager Bob Stephens, the council agreed to increase the city's unallocated reserve fund to $150,000 from $100,000.

And a majority of the council indicated the unallocated reserves would be increased even further by not earmarking funds for specific purposes such as $51,055 to be set aside for construction of a new fire station and $36,000 to pay off the fire pumper.

When the councilmen finished their slashing or modifying the budget that had been presented by the city manager, it was determined that it would be possible to cut the tax rate 20 cents from last year.

However, the councilmen seemed to feel that a "cushion" of sorts was needed and thus, "unofficially" indicated that a 12-cent reduction would be more in keeping.

SOME OF THE "decisions" made by the council on Monday were done by a divided vote.

A case in point was the recommendation by staff that all the gas tax funds that remained after subtracting $37,400 for the north loop sector by the new library and $38,170 for street sweeping should be used for site acquisition for the loop system. The balance was $113,400.

Councilmen Bill Podgorsek and Rusty Hammer were opposed to committing the gas tax money in that fashion. But by an "unofficial" 3-2 vote, with Mayor Dean Chamberlin, and Councilmen Norm Paul and Ralph Doetsch on the other side, it was decided that gas tax money during this fiscal year will be used to acquire rights-of-way for either the north or south loop streets.

IN ANOTHER 3-2 VOTE, it was "unofficially" decided that street sweeping would be charged to gas tax instead of the general fund as had been recommended. Thus the money available in the gas tax account would be cut by $38,170. Chamberlin and Doetsch favored charging the general fund with street sweeping but Paul, Podgorsek and Hammer were opposed.

But the reverse was true in another general fund to gas tax incident.

This time it was $20,800 that was earmarked for storm drains. Chamberlin and Doetsch were joined by Podgorsek in voting to charge the amount to general fund instead of shifting it to the gas tax.

Without barriers

City council approves traffic diversion plan

Most of the members of the audience who took the microphone at the last city council meeting, at an informal public hearing on the traffic diversion plan for East Campbell avenue, voiced objections to the barriers that were proposed for Arroyo Seco, El Solyo and Shady Dale intersections at Bascom avenue.

Their arguments apparently were effective, for the council approved the diversion plan without the barriers that had been proposed for those particular streets by Bill Wren, public works director.

However, the council specified that an evaluation of the traffic situation should be made in 60 days by staff to determine what effect the plan had on the other streets.

Under the adopted plan, traffic from East Campbell avenue will not be allowed to continue across Bascom avenue.

WVC board supports bill on secondary education

West Valley college trustees voiced support for AB770 Thursday evening, but with certain reservations.

The bill, which is coauthored by Assemblymen Frank Lanterman (R) and John Vasconcellos (D), would abolish the coordinating council for higher education and replace it with a new California postsecondary education commission.

Trustees directed Superintendent James P. Hardy to appear this evening Aug. 22 at the Senate Education committee hearing on the bill and explain they would favor passage of the bill, if certain amendments were added.

Under the bill as it is now written, the commission would have the right of approval of programs and capital outlay plans for community colleges. Also as now written, the bill would eliminate any educators from sitting on the commission.

In other action Thursday evening the governing board:

• Approved the lease of two classrooms located at the Campbell campus to San Jose community college district for the next year.

Moorpark school noise abatement work assured

Completion of the noise abatement program at Moorpark school was assured recently with the final testing results from the state division of highways.

The school is located near the Stevens Creek off-ramp of Highway 17. The level of traffic noise at the school has been a matter of concern to school officials.

Although the noise level at the local school was two decibles less than estimated, according to the report, in no case did it fall below the acceptable level of 50 decibels.

Last Wednesday Campbell elementary trustees awarded a contract to Frank Surian and Sons for the final rehabilitation work. Low bid was $225,000. The local district's share of this cost is about 31.4 per cent of the total with the highway department footing the balance.

Plans call for insulating six classrooms and the administration building and installing air conditioning systems in several of the affected classrooms.

First part of the project, installation of a wall adjacent to the freeway, was recently completed. Cost of this project were paid by the state.

Improving San Tomas Aquino channel

Modified flood plain will be used to keep the existing creekbed as close to its natural state as possible

Workmen repair last year's flood damage--prepare for next rains

By PAT SAFFORD

SCORES OF WORKMEN have been laboring in Campbell's summer heat repairing damage wrought by heavy rains earlier this year, and extending the concrete-lined channel along San Tomas Aquino creek.

Fences and yards of many homes along the creekbed suffered varying degrees of damage, when the raging waters swept away large portions of the bank.

(FIRST OF TWO ARTICLES)

The area along San Tomas Aquino road near Crockett avenue was especially hard hit. Construction along this portion of the creek was halted by winter rains with a large area of filled ground bordering the creekbed. This was the first to be swept away, along with fences, portions of backyards and at least one patio of the new homes which line the northern creekbank.

AT ONE HOME a backyard swimming pool hung on the edge of the creek while the storm waters cut under the bank along one side of the large concrete pool. The rains stopped and repair crews have been working to repair damage before the new rainy season begins.

The project now underway will eventually see some 6,200 feet of channel improvements, extending from the eastern boundary near Crockett avenue west to the area between Westmont avenue and Quito road.

In a report issued recently by the Santa Clara County Flood Control district, authored by Dr. Bernard H. Goldner, environmental specialist for the district, the project ramifications were outlined.

Along some 75 per cent of the project area a modified floodplain will be used, to keep the existing creekbed as close to its natural state as possible.

THE REMAINDER, including that area which saw heavy erosion earlier this year, will consist of a concrete-lined channel.

San Tomas Aquino creek has its headwaters on the eastern slopes of the Santa Cruz mountains. It flows northerly into Guadalupe slough which, in turn, flows into San Francisco bay.

According to the report, erosion of the channel could jeopardize large areas surrounding the creek in the event of major flood flows. "Water is most likely to break out of the channel in the Westmont high school area and flow north inundating large areas west of the existing areas as it did in 1952, 1955 and again in 1963."

The bottom of the channel under construction is 10 feet wide and the depth of the channel ranges from 12 to 17 feet. The existing creekbed is being filled with the material excavated from the relocated channel.

CONSTRUCTION WILL STOP this year at the confluence of Smith creek. Until work can resume again next year a transitional lining will be installed connecting the existing creek bank with the new concrete channel.

Plans call for removal of the two-lane creek crossing on San Tomas road and a new culvert constructed west of the existing crossing at Harriet avenue.

Levees and concrete floodwalls will be used in the area from McCoy to Westmont avenue. "In this way undesirable channel improvements such as concrete lining can be avoided." The floodwall will be about eight inches thick and will vary from two to five feet in height. "Whenever the right of way permits, and it is required," the report continues, "the levees will be used to provide flood protection above the existing creekbank level." In some areas the creek will be left in its natural state, such as the upper section near Westmont avenue.

A sediment control facility will be constructed at the upstream boundary near the conjunction of San Tomas Aquino and Wildcat creeks. Approximately one acre will be used for the facility consisting of an excavated basin below the existing channel bottom and a levee around the perimeter five feet in height. Total basin depth, including the levee, will range from nine to 14 feet.

FINALLY, A SEVEN FOOT-HIGH Ogee type spillway will be constructed in the concrete-lined channel section from the sediment control facility to Westmont avenue. To improve the appearance of the spillway walls, they will be textured on the top five feet of the inside walls and the entire outside.

(NEXT WEEK: WHY CONCRETE?)

THIS EROSION is in the area west of the San Tomas Aquino Road bridge crossing. Damage from the last record rainy season can be seen in the foreground. Plans call for removing the bridge and constructing a similar crossing at the end of Harriet avenue.

siren sounds

"PETTY" THEFT

The man that pulled into the parking lot of the Campbell Medical center last week and made off with a ladder is in for a surprise. He was observed by a passerby who jotted down his auto license number.

According to police reports, the man pulled into the lot and up to a garbage bin where the ladder was propped. He placed the ladder, valued at $10, in the back of his car and covered it with a carpet.

Police are checking out the license number.

CAMPBELL ELEMENTARY

Over $300 in damages were reported at Campbell elementary school last week.

Vandals damaged wiring, windows and telephones at the elementary school construction site.

BURGLARY

Hintze Upholstery, 38 E. Campbell ave., reported the theft of a $400 sewing machine, two scissors and a portable radio last week.

Colonel snatched

Colonel Sanders paid a two day visit to the Campbell Police department last week — in the locker of the evidence room.

The life-size replica of the Southern gentleman was stolen from the Kentucky-fried chicken store on Winchester boulevard by two suspects who were later apprehended.

Recovered was the five foot, 11-inch fiberglass statue of the Colonel weighing 40 pounds and valued at $350.

Store clerks took down the license number of the auto after the two men grabbed the statue and ran out of the store. They were later apprehended by Campbell patrolmen and cited for petty theft.

After a two-day stay in the police evidence locker the colonel is now back at his post in the Winchester fast food store.

Construction due on new learning centers

Construction gets underway early next week on two new learning centers at Forest Hills and Rosemary schools in Campbell.

Elementary trustees awarded the project to Barnhart Construction company last week on the low bid of $413,783.

The new additions for fifth and sixth grade students will feature movable panel partitions, redwood coffered ceilings and glass bay windows which can function as greenhouses. Completion is scheduled for early January.

Each building will house four classes and the 28 metal chalk and tack board panels can be moved within the room to create any number of possible classroom arrangements.

The two additions will be carpeted and have sheet Vinyl on the sink areas. Climate and lighting controls will also be part of the new 4,000 square foot buildings.

In addition, the Forest Hills addition calls for a sliding door opening to an outdoor learning area.

Also planned for the centers are movable furniture-storage units. Included in these plans are four teacher's units per building complete with desk and storage area and an audio-visual unit for each center.

Planning began on the project March 1, with state approval of the plans coming through in July. Bids were awarded at the Aug. 15 meeting with construction due to begin within 10 days.

The outside of the new structures will be finished to match existing facilities at the sites.

At Rosemary the center will be located at the end of the main corridor and at Forest Hills east of the main office adjacent to the portables.

Fair winners are announced

Hazel Atkinson of Campbell won a first place award at the Santa Clara county fair in quilt making. Shirley Kaiser also received a third place award in the same category.

Other local winners include:

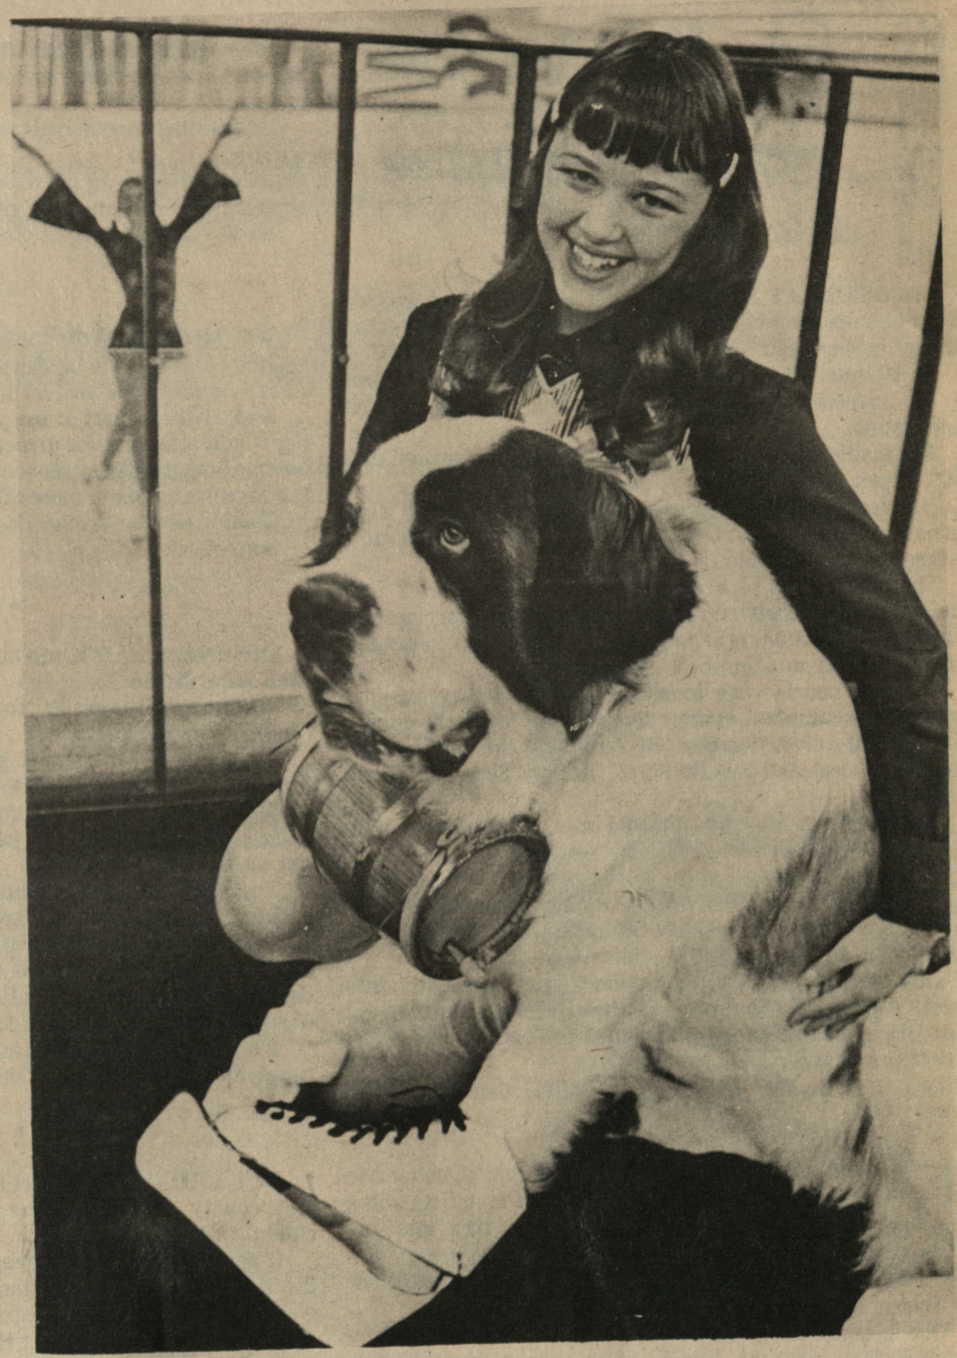
Virginia Marotti, a second place award in rugs.

Eileen M. Meir, a third place award in stitchery.

Zelma Soper, a second place award in knitting.

STARTING ON HER second ten books is Stacy Cattolina, winner of a reading certificate which signifies her participation in the summer reading program at the Campbell library. A youngster must complete ten books to win the award.

(Photography by Gordon Lew)



SUGAR'S READY . . . Debbie Viles, 910 Vicar lane, and her St. Bernard "Sugar" pause (paws?) during practice for the 21-hour skat-a-thon beginning Sunday, Aug. 26, at the ice arena in Eastridge shopping center. The skat-a-thon will raise funds for Project Hope.

Campbell skaters join skat-a-thon for Hope

Campbell skaters will join others from throughout the county this Sunday to raise funds for Project Hope, the international health organization.

The 21-hour skat-a-thon gets underway Sunday, Aug. 26, at 1 a.m. and runs until 10 p.m. that night. Locally, the fund raiser will be held at the Eastridge shopping center ice arena. Similar skat-a-thons are being held in Hayward and Concord.

Idea for the event came from the Mission Valley Ice Skating club, hosts of the North Bay skat-a-thons. Sponsors are pledging donations for every 25 minute skating period for each participating skater.

"We expect some of the skaters to be able to complete 21 hours," said Robert Thornell, president of the skating club. "That means a single skater with many sponsors can generate hundreds of dollars for Hope."

More than a dozen well known personalities have indicated they will skate at least a minimum of 25 minutes for Hope, Thornell said, including state senators Alfred E. Alquist and Clark Bradley and John Chaffetz, Channel 11 sports director.

Of the proceeds, 95 per cent goes to Project Hope, while the other five per cent goes to the USFSA memorial fund, a scholarship fund for skaters.

For more information about the skat-a-thon call 238-3962.

50 youngsters win reading certificates

An overflow crowd was on hand last week as over 50 local youngsters received their certificates of recognition by the Campbell library for reading at least 10 books in the summer reading program.

Story telling and refreshments were also part of the storytime party which climaxed the summer program at the 349 E. Campbell ave. library.

According to children's librarian Dolly Larvick, large groups of youngsters have attended the weekly programs which ranged from puppet shows to craft demonstrations. Preschoolers have also been visiting the library for morning story hours each Wednesday morning throughout the year.

Librarian Pat Walters announced that plans for school-age activities are being made and a new schedule of special events will be announced this fall.

OUT ON THE LIMB

with George Vierhus

"BLOCKED AT BASCOM AVENUE" . . . That was the description of the action taken by the city council as it appeared in the Merc-News.

And it upset a lot of people, including councilmen, because of the inaccurate connotation that was implied by that description.

The traffic plan that was adopted by the city council does NOT block Campbell ave. at Bascom.

Barricades at the intersection will allow left and right turns for traffic on East Campbell ave. It is a diversion move rather than a blockade.

The objective is to keep the commuter traffic off East Campbell avenue between Leigh and Bascom by forcing such traffic to turn left or right at Bascom rather than continuing straight ahead on Campbell avenue.

Business people with locations on Bascom avenue just south of the Campbell avenue intersection urged the council to modify the diversion plan by removing the barriers that had been suggested for El Solyo, Arroyo Seco and Shady Dale.

The business people felt it would hurt their business, if the barriers were allowed to remain.

Originally the idea for the barriers at those three intersections had been suggested by residents in the area who felt that traffic diverted from East Campbell avenue would scoot down their streets. And they didn't want that.

However, the business people on Bascom apparently did a good "selling job," for many of those who had favored the barriers in the first place had signed the petition that asked for their removal.

One might say that a U-turn was made in those cases. Sort of.

• • •

SPEAKING OF U-TURNS, one of the main objections to the barriers on those three streets was that motorists going south on Bascom avenue, who wanted to turn into the business firms on the street, would have to make a U-turn in the middle of the block to get to the stores because left turns off Bascom would be prevented by the barriers.

One businessman, Bernard Alter, of the Yardstick, explained that most of his business came from women customers and that it was his observation that most women disliked making U-turns.

In fact, he added, most women drivers were extremely nervous about making U-turns and would avoid them with a passion, or words to that effect.

So the Yardstick business would suffer.

WE ARE NOT PREPARED to debate the question of whether men are less nervous about making U-turns than women.

And neither are we ready to malign women drivers in any way.

Many women we know are more proficient behind the steering wheel than many men of our acquaintance.

So we will let it go at that.

• • •

WE SHOULD ADD, however, that, although the city council removed the barriers, it was also specified that the council would take another look at the situation in 60 days.

And, if the report of the public works department in 60 days indicated that the diverted traffic from East Campbell avenue had greatly increased the traffic on the other streets, the barriers on one or more of the streets might be added.

That would be another U-turn of events.

Sort of.

• • •

ORDINARILY WE refrain from "picking on" the San Jose Merc-News.

We generally prefer to ignore their more obvious mistakes in judgment.

But this week there were grossly incorrect presentations that we felt should be pointed out.

We have already chit-chatted about one of 'em where using "blocked" instead of "diverted," the wrong slant was put on the council action.

The other item was an editorial that appeared in the Merc entitled, "Another Good City-County Argument."

The editorial, in a rather baffling way, attempted to show how a recent survey of the time required by the sheriff's department to respond to calls in Cupertino proved the need of a single city and county of Santa Clara.

We agree with the editorial writer that the time delay of upwards 20 minutes was "shocking."

• • •

BUT THE CONCLUSION that consolidation of the cities and county would improve the situation seems utterly ridiculous.

If anything, the time survey made in Cupertino indicated the weakness of consolidation, for Cupertino is part of the county communications system at the PRESENT time.

The editorial admits that the problem was not so much a lack of deputy sheriffs "as it is cumbersome and clumsy communications and processing of the complaints received by telephone "

In our opinion, the editorial writer has become so enmeshed in his "crusade for consolidation" that his logic has become warped.

The obvious conclusion, it seems to us, from the problems revealed in the survey of time that was made in Cupertino, is that consolidation is NOT the answer.

Interestingly enough there is no such time lag for responses in Campbell. (If that ever did happen, we imagine that Police Chief Don Burr would climb the walls.)

Campbell about a year ago broke away from the county system. This city has its own dispatching service for police, fire, and public works under the direction of the police department.

It is working efficiently and economically.

We suggest that the Merc editorial writer should take another look at the results of that time survey in Cupertino with respect to responses handled through the county communications system.

If he can read into that survey an argument for consolidation, some how down the line some place, we must have missed something.

We also suggest in the interest of research, that the editorial writer than check out Campbell's response time in dispatching.

It could be revealing.

We doubt, however, that it would prove to be an argument for consolidation.

• • •

THAT COUNTY COMMUNICATIONS system is very confusing. Maybe "confusing" is not the proper word.

Then again maybe it is.

For example, it seemed incredible when Campbell broke away from the county system that this city could operate its own dispatching service more economically than if it continued with the county.

At that time, this city was contracting for dispatching service with the county at approximately $90,000 per year. Chief Don Burr was certain this city could operate a system cheaper than that. And he has been proved right.

Campbell's contract for dispatching service with the county had increased every year until it had reached the $90,000 plateau.

The other cities in the county were paying similar amounts.

But that was last year.

Now that Campbell is out of the system, those cities that contract for the county service today are getting it for FREE.

You can't beat that price.

• • •

THIS FREE SERVICE stemmed from a statement made by the county board of supervisors last spring specifying that the county would pick up the entire tab for dispatch service for ALL the cities in the county.

In other words, there would be just one communication system in the county. It was emphasized by the supervisors that the one system was necessary, if the emergency 911 telephone number was to be effective.

Obviously many of the cities were skeptical about such an ambitious plan.

In addition the city officials pointed out that the free service had to be given ALL the cities and not just some of the municipalities.

But it hasn't turned out that way.

Some cities are getting free service (Los Gatos, for one).

In our book, this is grossly unfair, because the financing is from the county general tax which is paid by both citizens within the cities and without.

We understand that the procedure is "justified" by county officials on the premise that it is a "phasing-out" operation.

In other words, as soon as possible or practicable, other cities will come into the county communication fold for the free trip.

In a rather ambigious directive to staff, the city council recently specified that a letter be written to the proper county authorities.

The letter would cover two points: (1) this city opposes the present county communication policy of giving free dispatching service to some cities and not to all and (2) when is Campbell going to get this free ride?

As an after thought, the councilmen thought they would like to see the letter before it was sent out.

Editorial

Time to get moving

BEFORE THE MONTH is ended the city council will adopt the final budget for the 1973-74 fiscal year and set the tax rate for the city.

Adopting the budget and setting the tax rate are tremendous responsibilities for members of the city council and city staff personnel.

As we have stated in previous editorials, the responsibilities of the councilmen are greater this year than at any time previously in this city's history.

But it is not because the city is hard-pressed financially.

Rather it is because the city is in better fiscal shape than in any time in the 21 years of its existence.

For probably the first time, the City of Campbell has the wherewithal to accomplish objectives that were only dreams in other years.

There are many who will argue with considerable merit that the first thing the council must do is to reduce the city tax rate by a substantial amount.

Last year the tax rate for the city was $1.30 per $100 assessed valuation. And of the $1.30, a special levy of 12 cents was included for the completion of the engineering wing at the city hall.

The wing has been completed and obviously the tax rate should drop 12 cents this year, even if the city's coffers were not as full as they are.

This next year could be the greatest in this city's history, if proper judgment is used in distributing the wealth.

While reducing the tax rate is always a commendable achievement, we also feel that the goals of the city should not be jeopardized because of an economy movement.

The council this month must establish a capital improvement program for the next year. In adopting the preliminary budget in June, the capital improvements were removed with the intent of replacing them when the financial figures were firmed up.

We submit that the major capital improvement for the city next year should be the downtown loop system.

We recognize that the money for the entire project is not available.

However, we feel the go-ahead signal should be given and the $249,203 that this city will receive from the gasoline tax each year should be earmarked for the loop system until the project is completed.

Mc Corquodale's proposal

Campaign finance resolution sparks lively county debate

By SUSAN COHEN

SUPERVISOR Dan McCorquodale introduced the county's first resolution regulating campaign contributions and costs last week, sparking a lively debate on just who should be allowed to contribute to candidates for county office and how much.

The proposed ordinance, which has been sent to the county executive and the county counsel for reports would:

- require complete disclosure of contributions and expenditures for any campaign in which they total over $200;
- forbid any single contribution over $1000 by an individual, group or corporation;
- set a spending limit of about $10,000 for incumbents and $12,000 for non-incumbents for each primary or final election;
- not allow anonymous contributions to a campaign to total over $50;
- set up a fair election practices committee appointed by the supervisors;
- provide for a fine or voiding of an election if the provisions are knowingly violated.

"THE NUMBER one issue is that it be made clear who made the contributions," McCorquodale said, indicating he was willing to compromise on some of the specific provisions, including raising the spending limit to $15,000.

McCorquodale said the most important provisions in his view are that "no longer would it be possible to hold a cocktail party and say 'I raised $7000' without providing a list of contributors" and that filing those lists would be required to continue after an election as long as fund-raising is still taking place.

The other supervisors expressed support of the intent of the ordinance but raised specific objections.

"A $1000 contribution for the kind of campaign we run in this county is much too high," complained Supervisor Sig Sanchez, adding, "this establishes a situation where 10 or 15 people could finance your entire campaign."

McCorquodale defended the limit, saying it would "encourage groups to make their contribution directly rather than being broken up in order to meet a small limit." This, he said, would lead to fuller disclosure and less "going in the back door."

Supervisor Vic Calvo suggested that the fair election committee be chosen by someone other than the supervisors, perhaps by the superior court. He also objected to different spending rates for incumbents and non-incumbents.

BOB GERARD, a local Common Cause member who is now drawing up a state ballot initiative to control campaign financing, was called for comment on county election control.

The problem, Gerard said, is to balance control of campaign costs with the need to spread information on issues.

"It requires substantial expenditures in county races to get information through to the public," Gerard said, adding that disclosure is the most important problem.

"We need much more information on county races," Gerard said. "On the whole, voters have very little information on candidates' backgrounds."

Richard Bosted named San Carlos fire chief

Battalion Chief Richard Bosted of Campbell fire department was named fire chief of the city of San Carlos on Monday.

Bosted, 42, came to Campbell as training officer in June, 1969 and last year was designated battalion chief for training when the department was reorganized under Fire Chief Borden.

Although Bosted is actually fire chief in San Carlos, officially he is "deputy public safety director" under a new alignment of the fire and police departments in San Carlos by which the police chief is designated as "director of public safety".

Bosted was picked for the San Carlos job from a large list of applicants. In announcing the appointment, San Carlos city administrator Bob Allen said that "Bosted was the best man for the job."

Bosted has had 18 years of experience in fire departments. He was a fire engineer in Compton and a fire captain in Brea before coming to Campbell.

While in Campbell, the new San Carlos fire chief was instrumental in developing mutual aid agreements with neighboring cities and has taught courses in fire science at San Jose city college. He holds a vocational education teaching credential.

Bosted and his wife, Saundra, reside in Campbell. He has two married daughters, Catherine Townsend and Deborah Main. living in Oregon.

CAMPBELL fire department battalion chief Richard Bosted has been named fire chief for the city of San Carlos.

Letters to the Editor

In appreciation of Little League

EDITOR:

Our entire family would like to publicly thank all managers, coaches, families and friends who gave so willingly and selflessly to all our young boys during the Campbell Little League baseball season!

It was a great experience for our boys and for us to share the encouragement, enthusiasm and good will that we experienced during this time.

A lot of negative things have been said about Little League but we say, "Hurrah! hurrah!" to these fine people who are involving the boys and themselves, too, in meaningful relationships, fun and fair play.

The Sullivan family
2289 Wren Way, Campbell

BUMPER CROP ... While many Campbell homes can boast a garden, only one service station has that distinction. George and Bob's Union Service, 337 E. Hamilton ave., has another crop of corn this year. According to owner Robert Naranjo, he's picked over 100 ears so far this summer.

(Photography by Phil Nelson)

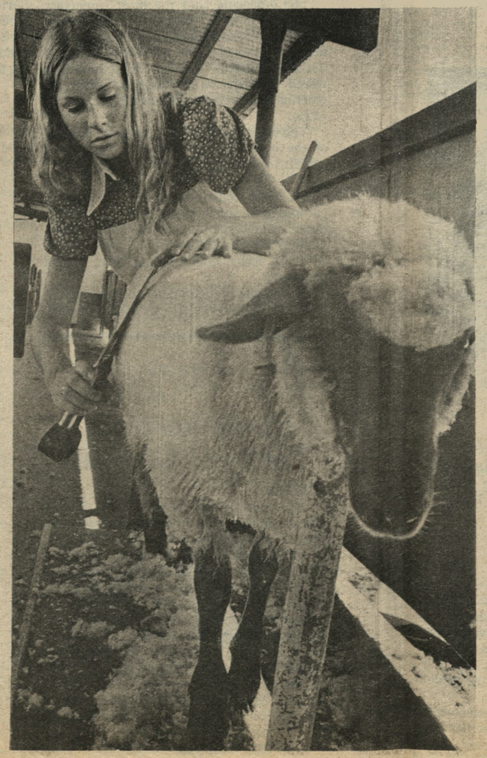
The FFA farm /

Reflection of a changing time

Usually docile steers caused excitement recently when they broke away and trotted around the baseball diamond

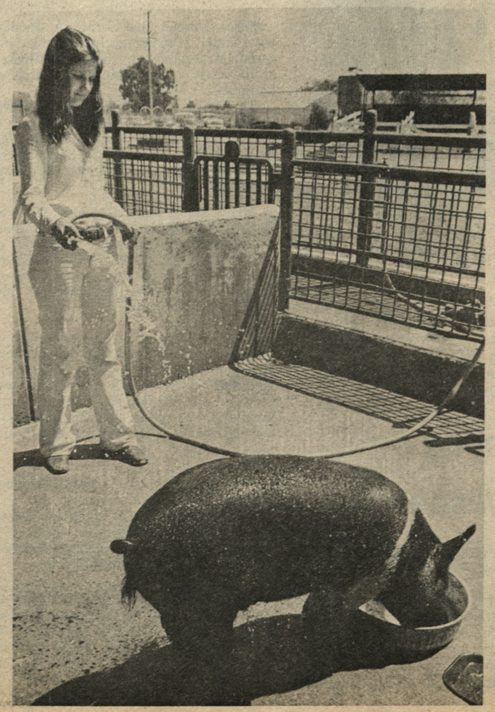
"Don't shove" — The little lamb on the right doesn't quite fit into the feeding trough at the Westmont FFA farm.

Sprucing up, Kim Eastman gets her sheep ready for the county fair. A member of Future Farmers of America, Kim is one of scores of local young people taking part in the fair which runs through August 26.



"Everybody out of the mud" — Lynda Gillingham looks like she may be getting a headache. The pigs had just had their daily bath when they decided to do a little wallowing.

(Photos by Wayne Fogle)



Clean as a pig's whistle — Future Farmer of America Lauri MacDonnell gives her pig a cooling shower at the Westmont farm.

By PAT SAFFORD

WESTMONT FARM, the Future Farmers of America facility across from Westmont high school, reflects the changing face of Campbell.

When founded, over 15 years ago, just a few animal pens were available for students without their own facilities at home. According to Dixie Mitchell, director of vocational agriculture, those students were in the minority. Most local youngsters had plenty of room at home to house their steer, lamb or pig.

Today, almost all livestock raised by FFA members is housed at the Westmont farm.

Built entirely by the students and instructors, the farm boasts a large red barn which holds 22 tons of baled hay, scores of pens, a green house and horticulture section and a rustic, gold trimmed building with a large outside clock that keeps good time.

In addition to classrooms, the farm center also contains two giant metal grain bins and feed mixing trays covered with a red shingle roof.

Late last year local FFA members began raising their animals to show at the Santa Clara County Fair which runs through Aug. 26. Those animals which have reached market weight will be sold at the junior livestock auction on Saturday, Aug. 25, at the Tully road fairgrounds. The agricultural exhibits will be at the rear of the fairgrounds.

Students enrolled in vocational agriculture classes at Prospect, Campbell, Camden, Del Mar, Leigh, Blackford, Branham and Westmont high schools can make use of the local farm.

THE CENTER WAS a hub of activity last week as students got their animals ready for the 29th annual Santa Clara county fair. Three future agriculture teachers were on hand to act as judges as students put the steers through their paces on the Westmont high school football field.

Players and spectators at Quito Little League senior minor games, which are played on the Westmont field, have been startled to see the huge steers being "taken for a walk" around the fields during game time. The steers, usually docile, caused some excitement a few weeks ago when one broke loose and trotted around the baseball diamond.

Five classes of beef are raised at the farm, according to Mitchell. Hereford, Angus, short horn, Charolais and cross-breed grew from the 500 pound calves early in December to the huge animals tipping the scales at over 1,000 pounds last week.

Although students may raise other livestock such as sheep and pigs at the center, only one steer can be raised by each future farmer.

Instructors Robert Crabtree and Richard Davis were busy last week stocking up on feed for the "red barn." Although the center has the facilities to store large amounts of feed, wholesale grain costs climbed in recent months. With a few volunteers the teachers set out to pick up sacks of grain in the red and white FFA truck. By supplying the muscles they can keep feed costs at a minimum.

Youth commission vacancy this fall

When the Youth Advisory commission begins the regular fall schedule of meetings, there will be one vacancy on the seven-member body because of the resignation of Julie Thiebaut.

At the last city council meeting, the resignation of Miss Thiebaut was accepted with regret and a certificate of service was approved.

In her letter of resignation, Miss Thiebaut explained that she was moving out of the city to Aptos for the summer and would be attending Santa Clara university in the fall.

I would like to thank you all for the knowledge and experience that I have gained from serving on the youth commission for these past two years," she added in her letter.

If the procedure used for previous appointments is followed, those interested in serving on the commission will be asked to fill out applications at city hall. The applicants will then be interviewed by the commission and recommendations made to the city council. Commissioners must live within the city limits of Campbell.

Present members of the youth commission are: Ben Gullo, chairman; Becky Campos, Cindy Casteel, Doug Hebard, Joanne Jubran, Nathan Rodney.

Montalvo setting for Weber, Olsen vows

The garden of Villa Montalvo was the setting for the afternoon wedding of Marcia Marie Weber and Clifford Charles Olsen Jr. The double-ring ceremony was performed by Rev. G. Allen Read.

The bride, daughter of Mr. and Mrs. Mark C. Weber, was given in marriage by her father. She wore a white silk organza gown which featured a bodice of venice lace over English net. A floor-length silk illusion veil with a floral headpiece completed her costume. She carried a bouquet of white pompom daisies, lavender daisies, zorina roses and baby's breath.

Melanie Lee Weber, the bride's sister, attended her as maid of honor. Bridesmaids were Holly D. Weber, the bride's sister-in-law, and Susan Olsen, the groom's sister. Genell King, a cousin of the groom, served as flower girl.

For her daughter's wedding Mrs. Weber chose an apple green organza dress and a matching picture hat. She wore a white cocktail orchid corsage as did Mrs. Georgette Olsen, mother of the groom, who was outfitted in a pink cotton embroidered dress and matching picture hat.

Mark Adams served as best man. Ushers were Gregg McCann and Michael Santoro. Serving as ring bearer was the bride's nephew, Mark Clair Weber III.

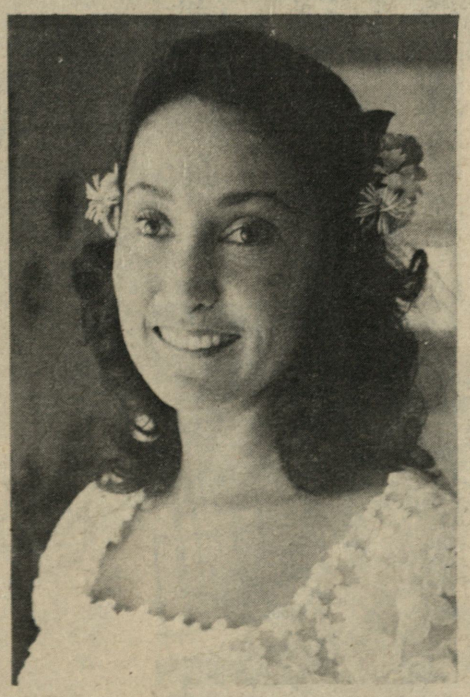
The groom's cousin, Allen Olsen, and his string quartet provided music for the ceremony. Vocal selections were offered by Holly D. Weber. Guitarist was Ken Jercha.

A champagne luncheon reception in the Villa Montalvo gardens followed the ceremony.

The bride, an honor graduate of Campbell high school, received a scholarship to the University of California at Santa Barbara. She graduated with great distinction and received a degree in speech pathology and audiology from San Jose state university. She is a member of the Phi Kappa Phi honor society, a member of the Speech and Hearing Association and is now a graduate student at Kansas state university where she is an assistant to the professor in speech pathology.

Clifford, an honor graduate of Pioneer high school, also graduated with great distinction and received a degree in speech pathology and audiology from San Jose state university. He is a member of the Speech and Hearing Association and is presently a graduate student at Kansas state university where he received a fellowship in audiology.

After a wedding trip to Hawaii the couple will return to Kansas.



The garden of Villa Montalvo was the setting for the wedding of Marcia Marie Weber and Clifford Charles Olsen, Jr.

Garden wedding planned by Joyce Herrick, Bill Oglesbee

Mr. and Mrs. Jack D. Herrick of Campbell recently announced the engagement of their daughter, Joyce Herrick, to Bill Oglesbee.

Joyce is a graduate of Campbell high school and San Jose state university where she majored in home economics. She is now employed by the San Jose parks and recreation department.

Parents of the prospective bridegroom, Mr. and Mrs. Richard Oblesbee, reside in Mountain View.

Bill attended schools in Mountain View and is a recent graduate of San Jose state university where he majored in philosophy. He is employed by Acurex Electronics in Mountain View.

The couple plans a garden wedding Aug. 25.

Callsheet

with C. Michael

Several Europe bound vacationers from Campbell have returned home from their recent travels abroad.

"Unbelievable, fantastic, and the greatest experience of my life" are just a few of the superlatives used by SUE BIRDWELL of La Vonne drive to describe her European adventure.

Sue and 66 other high school students from Campbell and surrounding areas traveled to Madrid, Toledo, Rome, Florence, Salzburg, Lucerne, Paris and London.

The young people, traveling through the Foreign Study League, were accompanied by several counselors including Campbell high drama teacher JOHN HALL . . .

Returning from England is CLAUDINE DUREN, daughter of Mr. and Mrs. Floyd Duren of Marilyn drive who spent the month of July in Uxbridge, England, visiting her friend PENNY CLARK.

Penny, a former resident of Campbell and a graduate of Prospect high school, is in nurses training in Uxbridge.

Buckingham Palace, Windsor Castle and Westminster Abbey were among points of interest visited by the girls. A weekend of sightseeing in Paris completed their itinery . . .

State-side traveler, Mrs. LULU BOWKER of Dunster drive, left recently for a visit with relatives and friends in and around her "old home town" of Barnegat, New Jersey . . .

THIS 'N THAT . . .

ALFRED CODE of Central Avenue has been released from the hospital and is on the mend after suffering injuries in an auto accident last month. Mrs. Code, who was also injured in the mishap, was treated and released the day of the accident . . .

The Business and Professional Womens lub reminds Campbellites that they can help purchase toys and other supplies for the mentally retarded youngsters at the Porterville facility by saving food coupons received through the mail or clipped from magazines or newspapers.

The coupons may be mailed to Mrs. Stander at 2260 Starbright dr., San Jose 95124 . . .

Former United Airlines stewardesses are invited to a membership dinner of the San Jose chapter of Clipped Wings. The informal Hawaiian luau is being held at the home of Ms. Jacqueline Flynn of Los Gatos on Wednesday, Aug. 29, at 6:30 p.m. Contact Mrs. Brown, 266-3095 for reservations.

The former UAL stewardesses meet in members' homes on the second Wednesday of every month for social and philanthropic purposes. Membership of the group extends from Los Altos, Mountain View, Sunnyvale, Campbell, Saratoga to San Jose. Prospective members are welcome to attend any meeting of the month.

Miskulin, Hughes wed in double ring ceremony

Susan Miskulin and James A. Hughes were united in marriage in a double ring ceremony performed by Rev. Alan Goozee at the First United Methodist Church of Campbell.

The bride is the daughter of Mr. and Mrs. George F. Miskulin of Campbell. She is a graduate of Del Mar high school and the University of California at Davis. She received her teaching credential from San Jose state university.

The groom is the son of Mrs. Winifred Hughes and the late Robert Hughes of Bangor, Pennsylvania. A graduate of Bangor high school and East Stroudsburg state college, he is presently employed as an English teacher for the Campbell elementary school district.

Susan, who was given in marriage by her father, chose for her wedding day a pinafore style gown of silk organza and Nottingham lace. Her full length silk illusion veil was secured with a Camelot cap of re-embroidered lace and pearls. She carried a bouquet of white baby roses, stephanotis and baby's breath.

The bride's sister, Leanne Miskulin, attended her as maid of honor.

Bridesmaids were Jennlea Owen, Patricia Moore and Karen Donohue.

Flower girls were Kristin and Pamela Sheckler, both nieces of the groom.

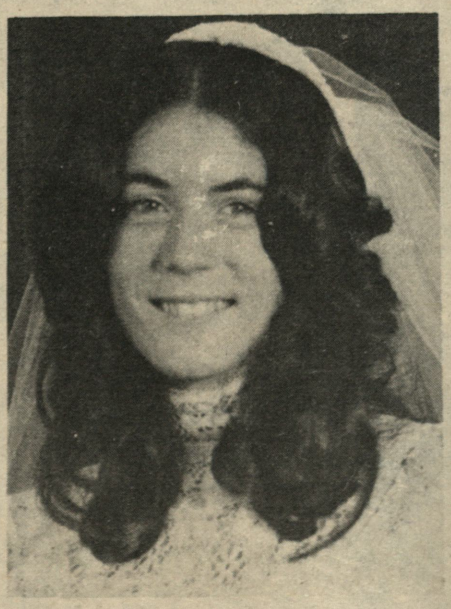
Paul Sheckler, the groom's brother-in-law, served as best man. Guests were seated by ushers Steve Miskulin, brother of the bride, Gerald Haas and Roger Carsrud. Vocal selections were offered by Verlene Rettig who also played the guitar.

For her daughter's wedding Mrs. Miskulin wore a floor length lavender jersey dress and a lavender orchid corsage.

Mrs. Hughes, mother of the groom, chose a floor length yellow lace dress. She also wore a lavender orchid corsage.

A reception at the home of the bride's parents followed the ceremony.

The newlyweds, who are honeymooning in Carmel, will make their first home in Santa Clara.



Susan Miskulin recently became the bride of James A. Hughes in a double ring ceremony at the First Methodist church.

LEGAL NOTICE

ORDINANCE NO. 907

BEING AN ORDINANCE ESTABLISHING RULES AND REGULATIONS FOR THE ISSUANCE OF SWIMMING POOL PERMITS AND ESTABLISHING PERMIT FEES THEREFOR.

Chapter 18.24
SWIMMING POOLS

Sections:

18.24.010 Definitions.
18.24.020 Building permit.
18.24.030 Pools in violation of chapter prohibited.
18.24.040 General construction requirements for permanently installed pools.
18.24.045 General construction requirements for storable pools.
18.24.050 Indoor swimming pools.
18.24.060 Protective barriers.
18.24.070 Permit fees.

18.24.070 Definitions. (a) "Body of water" means any body of water such as a reservoir, tank, pond, etc., not defined in this section as a wading pool or swimming pool.

(b) "Private swimming pool" includes all artificially constructed pools which are used in connection with an appurtenant to a single family residence and available only to the family of the householder or his private guests.

(c) "Public pool" includes all artificially constructed pools which are available to the general public either free or by paying a fee.

(d) "Semi-public pool" includes all artificially constructed pools which are used in connection with multiple family or cooperative groups (such as apartments, hotels, motels, private clubs, subdivisions, etc.) and available only to such groups and their private guests but not available to the general public.

(e) "Swimming pool" means an artificial pool of water including all appurtenances to its use and used for swimming or recreational bathing.

(1) "Permanently installed swimming or wading pool." One that is constructed in the ground, on the ground, or in a building in such a manner that the pool cannot be readily disassembled for storage.

(2) "Storable swimming or wading pool." One that is so constructed that it may be readily disassembled for storage and reassembled to its original integrity.

(f) "Wading pool" means either a storable or permanent water container for recreational wading purposes which at its deepest point is not over thirty-six inches.

18.24.020 Building permit. (a) It is unlawful for any person, firm, association or corporation to construct, alter, remove or demolish or to commence the construction, alteration, removal or demolition of a swimming pool without first obtaining a building permit from the building official.

(b) An application for such permit shall be submitted in such form as the building official may prescribe. Such application shall be made by a contractor holding a valid state and city license, or the owner who will do his own construction after obtaining the required owner-builder permit. Such application shall contain the full names and addresses of the applicant and/or the owner, and if the owner is a corporate body, of its responsible officers. Such application shall describe the proposed work and shall give such additional information as may be required by the building official for a proper understanding of the proposed work.

(c) Application for permits for public and/or semi-public pools shall be accompanied by a certificate of acceptance by the county department of health, plans, calculations and specifications in duplicate, and shall be in sufficient detail to show the following:

(1) Plot plan, including all easements and overhead utilities adjacent to pool area or over the property.

(2) Pool dimensions, depths, and volume in gallons;

(3) Type and size of filter system, filtration and backwash capacities;

(4) Pool piping layout with all pipe sizes shown and type of material;

(5) Pool pump capacity;

(6) Waste disposal system;

(7) Other pertinent data as may be required by the building official.

(d) If, after examination, the building official finds the application to be in compliance with the law and ordinances applicable and the proposed construction or work will be safe and adequate, he shall approve such application and issue a permit for the proposed work as soon as is practicable. If his examination reveals otherwise, he shall reject such application, noting his findings in a report to be attached to the application.

(e) The building official may revoke a permit issued under the provisions of this chapter in the event he finds that there has been any false statement or misrepresentation as to a material fact in the application or plans on which the permit was based.

(f) All work performed under a permit issued by the building official under this chapter shall conform to the approved application and plans.

(g) Any plans submitted, not showing all the requirements for the granting of a permit, shall not be construed as constituting a waiver of any provision of this chapter or of a sanctioning of any violation thereof. (Prior code No. 8105.2).

18.24.030 Pools in violation of chapter prohibited. Whenever the building official finds that construction or work in connection therewith, the erection or construction or alteration, execution or repair of which is regulated, permitted, or forbidden by this chapter, is being erected, constructed, altered or repaired in violation of the requirements of this chapter, or in violation of a detailed statement or plans submitted and approved under this chapter, or of a permit issued under this chapter, he may serve a written notice upon the responsible person directing discontinuance of such illegal action and the correction of the condition which constitutes a violation of the provisions of this chapter. In the event that within the specified time to comply, the notice has not been compiled with, the building official shall institute an appropriate action or proceeding at law to restrain, correct or remove such violation or the execution of work thereon. (Prior code No. 8105.3).

18.24.040 General construction requirements for permanently installed pools. (a) Electrical Wiring: Electrical wiring shall conform to the electrical provisions set forth in the electrical code of the city.* No electrical wires, including telephone, cable TV, shall be extended across the pool area at any height. See National Electrical Code 680-8.

(b) Water Heating Equipment: Swimming pool water heating equipment shall conform to the provisions set forth in the plumbing code of the city.** Water shall not be allowed to enter the pool at a temperature above 100°F.

(c) Gas Piping: Gas piping shall conform to the provisions set forth in the plumbing code of the city.

(d) Waste Water Disposal: The waste water disposal shall conform to the provisions set forth in the plumbing code of the city.

(e) Portable Water Supply: The water supply shall conform to the provisions set forth in the plumbing code of the city.

(f) Water Treating Devices: Where devices for chemically treating the water to be used in the pool are installed, they shall meet the requirements of the county department of health.

(g) Plumbing. All piping and appurtenances shall conform to the provisions set forth in the plumbing code of the city.

(h) Filter and Recirculation System: All pools shall be equipped with an efficient and dependable circulation and purification system, consisting of circulation pumps and piping arranged for optimum circulation in the pool, and a filter with the usual and necessary appurtenances as approved by the building official. Such system shall be operated at all times when the pool is in use. There shall be provided a complete turnover of the pool water in twenty-four hours or less for private pools, and eight hours or less for semi-public or public pools.

(i) Underwater Lighting: Each public and semi-public pool shall have installed at lease one underwater lighting fixture.

(j) Steps and Stairways: Steps and stairways for entering or leaving the pool shall be of such construction as to minimize danger. Convex, semi-circular or triangular steps shall have rounded corners.

There shall be at lease one stairway for exiting or entering the pool, located in the shallow end; there shall be at least one ladder for entering or exiting the pool at the deep end. Treads of ladders and/or steps shall be of non-slip construction.

(k) Runways or Decks: Runways, at least thirty inches wide for private pools and four feet wide for public pools, shall be placed adjacent to the pool. Runways shall be sloped one-fourth inch to the foot away from the pool, and should be of a material approved by the building official, which shall be of non-slip texture, easily cleaned. Grading around the pool area shall be such that the surface runoff shall be diverted from the pool.

(l) Scum Gutters and Skimmers: Scum gutters and skimmers shall conform to the requirements of the State Department of Health. Inlets for fresh or repurified water shall be located to produce a reasonably uniform circulation of water throughout the entire pool without the existence of "dead" spots.

(m) Springboards or Platforms: There shall be a minimum of fourteen feet of clearance above each springboard or platform. The depth of the water in the area adjacent to the springboard or platform shall not be less than the safe limits below. The minimum safe depth of water shall extend horizontally from the wall under the board or platform at least fifteen feet but beyond the extremity of the board or platform, this horizontal distance shall in no case be less than shown in the table below.

Elevation Of Platform Above The Water Level	Minimum Safe Depth Of Water	Horizontal Distance From End Of Board
1 Foot	5 Feet	10 Feet
3 Feet	6 Feet	10 Feet
5 Feet	7 Feet	13 Feet
7 Feet	8 Feet	16 Feet
10 Feet	9 Feet	20 Feet 6 Inches

As the elevation of the platform exceeds ten feet, the horizontal distance shall increase at the rate of one and one-half times the height above three feet plus ten feet, and the safe depth shall lower at the rate of one-third times the height above then feet plus nine feet.

(n) Clearances: No private pool shall have its water line closer than five feet from any property or building line, except pools may be not closer than 30 inches to the building if satisfactory evidence is submitted to show that no damage to the building will occur, or any other hazardous or unsafe condition will be created. No semi-public or public pool shall have its water line closer than five feet from any property line, or four feet from any building line. No pool equipment pit shall be located closer than five feet from any property line.

(o) Walls and Floors: The walls and floors shall be of an approved, engineered design and constructed to be structurally sound under the conditions of the site. The pool walls and floor shall be constructed of smooth, non-absorbent materials, free from cracks, light in color, and be so constructed as to be properly drained through one or more metal grated openings. A tight, leakproof pool with easily cleaned surfaces shall be provided. The inner surface of the pool must be coved, rounded or bullnosed at all joints, corners, angles of bases, walls, floors or curbs. No sharp corners or projections will be permitted. Floor drains shall be flush with the finished surface. The materials used in wall and floor construction shall conform to the provisions of the building code of the city.*** (Prior code No. 8105.4).

18.24.045 General construction requirements for storable pools: The following provisions of 18.24.040 shall apply. a, b, c, d, e, f, g, h, j, l, n.

(m) Springboards and Platforms: Platforms shall not be over five feet measured from the ground to the deck. The deck shall be a minimum of three feet square and have guard rails forty-two inches high. Springboards are not permitted.

(o) Installation: Storable pools shall be installed as per manufacturer's instructions.

18.24.050 Indoor swimming pools. In addition to the remainder of the requirements in this chapter, indoor swimming pools shall have windows or a skylight equal to at least one-half of the surface area of the pool, provided that artificial light may be used in lieu thereof if approved by the building official. (Prior code No. 8105.5).

18.24.060 Protective barriers. Every swimming pool, or other outside body of water shall be completely surrounded by a fence or wall not less than six feet in height. The fence or wall shall be so constructed as not to have openings, holes or gaps larger than four inches in any dimension, except for doors or gates; and if a picket fence is erected or maintained, the horizontal dimension shall not exceed four inches. A dwelling or accessory building may be used as part of such enclosure.

All gates or doors opening through such enclosure shall be equipped with a self-closing and self-latching device for keeping the gate or door securely closed at all times when not in actual use; except that the door of any dwelling, which forms a part of the enclosure, need not be so equipped.

The duty of providing and maintaining such enclosure shall be upon the person, association, firm or corporation occupying the tract of land upon which the pool or body of water is located, or the owner of any tract of land which is vacant or unoccupied.

Indoor pools shall be maintained in a separate room of any building or if in a portion of a room, a protective barrier shall be used to enclose the pool utilizing whatever walls are available.

The legislative intent of this section is the protection of the inhabitants of the city, particularly children, from the hazards to life and safety inherent in the presence of unenclosed pools or outside bodies of water.

The building official is authorized and empowered to modify in individual cases the requirements of this section with respect to the height, nature and location of the fence, wall, gates, or latches, or with respect to the necessity therefor, upon a showing of good cause and satisfactory assurances that the degree of protection is not thereby reduced. The building official also may permit the use of protective devices or structures other than those specified in this section, so long as the degree of protection is not thereby reduced.

18.24.070 Permit fees. The fees charged for the issuance of a permit to construct and/or enclose a pool or outside body of water in the city shall be as follows:

SCHEDULE OF PERMIT FEES

Building permit fee shall be based on Table 3-A Uniform Building Code.

Plan check fee not required.

Plumbing Permit:

Public or semi-public pool	$30.00
Permanent private pool	20.00
Storable private pool	10.00

Electrical Permit:

See electrical fees.

18.24.080 Inspection. All portions of the construction of the pool shall be inspected by the building official or his representative to insure compliance with the required codes of the city. A final inspection to allow occupancy cannot be made until the pool is completed, filled with water and the filter system is in operation and that all phases function correctly. (Prior code No. 8105.8).

* The electrical code of the city is codified in Chapter 18.16.

** The plumbing code of the city is codified in Chapter 18.08.

*** The building code of the city is codified in Chapter 18.04.

PASSED AND ADOPTED this 13th day of August, 1973 by the following roll call vote:

AYES: Councilmen: Doetsch, Hammer, Paul, Podgorsek, Chamberlin

NOES: Councilmen: None

ABSENT: Councilmen: None

APPROVED:

Dean R. Chamberlin, Mayor

ATTEST:

V.M. Sheehy, Deputy City Clerk

X. Requested report on Santa Clara Valley Medical Center incident of files falling on staff.

Adjourned.

ATTEST: DONALD M. RAINS, Clerk
Board of Supervisors

PUB: 8-22-73 33CP

Good Sam pins auxiliary members

Mrs. Dean Brown and junior members Linda Eaton and Pam Hover of Campbell were among the 56 junior and senior members of the Good Samaritan hospital auxiliary receiving their emblems recently at the San Jose facility.

All had completed a six month provisional period which entitled them to the honorary emblem.

Work could make Vikes a contender

The Camino Norte conference record for most consecutive football championships is four. And the owners of that record are still rolling.

The West Valley college gridders hold the loop standard for four straight championships, having won the coveted crown every year since 1969.

And they'll be out to try and extend that record when they open 1973 in September with 18 returning lettermen from their 1972 CNC co-championship team.

But even though the Vikes will have experience on their side, it will take a lot of work before they will be ready to contend for the title flag.

"This year we face the toughest schedule ever played by a West Valley college football team," said Viking field boss John Nicholas looking ahead to '73. "But in the past the Vikings have always been able to come up with good teams."

The coach rates De Anza and Contra Costa as the real CNC title favorites for the coming season but adds that "with work we could be a contender."

"We'll need to fill many spots that have been vacated by sophomores going to play football elsewhere," said the second year head Viking mentor.

The West Valley strength will be in their offensive backfield according to Nicholas, three years the WVC line coach before winning the head job last year.

Letterman Rick Mallman (Prospect) is the leading quarterback heading into preseason workouts. Mallman, 6' and 175 pounds, gives WVC a sharp thrower at the held of their Power I offense.

Hard charging lettermen Roger Cantrell (Branham) and Rick Gonzales (Branham) are top backfield candidates at tailback and fullback, respectively. Transfer Rick Soulsby (Camden), a 6'2" and 215 pound fullback, will also add strength to the backfield.

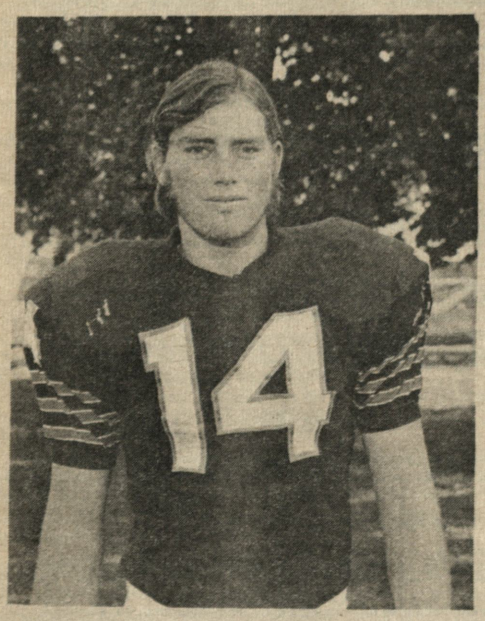
With the exception of tackle Steve Williams (Del Mar) and tight end John Baggerly (Los Gatos), the Vikings will be inexperienced in their offensive line.

The defense will also be inexperienced but "should have more size than last year," according to Nicholas.

Linebacker Jim Wittman, defensive back Mike Oliver (Leigh) and defensive end Ken Padia (Leigh) spearhead the Viking D unit. Oliver and Padia were both all-conference performers last season.

Along with those already mentioned, split end Fran Conte (Del Mar), defensive tackle Bill Magnuson (Branham), defensive tackle Chuck Uhler (Branham), defensive end Marty Brown, defensive halfback Charlie Brown (Del Mar), defensive back Dan Ulkovic, fullback Jeff Mickey, defensive back Sam McClure, split end Joe Villareal and place kicker Dave Gee (Los Gatos) will all return for their second WVC season.

Soulsby is one of four first year Vikings expected to do well at WVC. Gary Mulch (Westmont), offensive tackle Steve Guzzetti (Leigh), defensive back, and Eric Johnson (Los Gatos), guard, should all be counted on heavily by the Vikes.



SIGNAL CALLER — Heading into the 1973 camp, Rick Mallman (Prospect) is one of the candidates to be the West Valley Viking's top quarterback.

MEDAL WINNER — A big smile greeted our photographer recently when he aimed his camera at Janet Allen, one of several children to earn a medal at the Swim-a-thon held at Los Ranchitos Cabana club. Janet raised over $10 in pledges for her swimming efforts on the day to earn the medal. The swim-a-thon was a day long event and its main objective was to raise money for swim lanes and racing lines on the bottom of the Cabana club's pool.

Photo by Jesus Garza.

LETTERMAN — Returning from last year's grid wars is West Valley split end Fran Conte (Del Mar).

X-country steps to young level

There's more than just autumn leaves and football around the area in the fall season. And cross country is trying to make their fall mark.

Cross country is growing in popularity with many high schools turning out more and more strong runners as the years go by.

But the Appaloosa track club of the Berryessa athletic association would like to take cross country one step lower. They are interested in forming a league in the Santa Clara valley for age group cross country.

"Cross country is a wonderful fall sport and it has much to offer all of the girls and boys who take part," said Appaloosa coach Gary Gallego. "It's not only an enjoyable activity, but it is fundamentally sound in total development, both mental and physical."

"It's remarkable that so many youngsters who have had little success in other sports, have found a place in cross country running," added Gallego. "This is true because there is no other sport or activity where sheer determination, hard work and devotion to a goal pay such great dividends."

"Without a doubt, great and near great cross country runners are made and not born," he put in.

The age group levels would be nine and under, 10-11 and 12-13 for both boys and girls. The distances run would range from three quarters of a mile to one and a half miles.

Appaloosa, from the Piedmont Hills area, would like to get clubs started in the following areas: Mt. Pleasant, Overfelt, Silver Creek, Almaden, Evergreen, Blossom Hill, Willow Glen, central San Jose, west San Jose, south San Jose, James Lick, Santa Clara, Milpitas and anywhere else where there may be interest.

A meeting has been set for August 16. Anyone interested in coaching a team or helping in some way is urged to attend. The season would run from September to mid-November. For further information call or write Gallego (259-5324), 1091 McCreey ave. No. 2, San Jose (95116).

On the hot corner

By DICK SPARRER

Sports Editor

"Do you swear to tell the truth, the whole truth and nothing but the truth so help you God?"

By placing a right hand on a Bible and uttering the preceding sentence, we believe that no one in his right mind will do anything but tell the whole truth when questioned in a court of law.

Well, it seems the world of sports could learn a lesson from its judicial counterpart—just to prove that honesty is the best policy.

There's little honesty in the world of sports. Children are taught to stretch the truth as early as little league baseball and Pop Warner football, because winning in sports is always first and foremost.

We teach our youngsters early in their athletic life to go along with an official's call. If he's playing third base and misses a tag but the runner is called out, he's supposed to keep his mouth shut. If the ump should ask him if he made the tag, just a little nod does the trick.

It's hard for parents to teach their children to be honest if their coaches go against that policy on the field.

What do you think would have happened to that third sacker if he looked up and told the umpire he missed the tag? First of all the runner would be called safe. But when the third sacker got to the dugout, you can bet the coach or manager was waiting for him to give him a good tongue lashing.

But fibs-for-victory aren't just solely for little leaguers and aren't just found in baseball. It's unfortunate, but dishonesty can be found in all athletics.

No one really thinks of the athletic prevevication as lying—it's all part of the game. But to a young person at an impressionable age, lying is exactly what it is.

Now I don't really mean to condemn all athletes for not being entirely truthful in a game—I've done it all myself. But everyone is always alleging that sports prove a real character builder, And those same persons claim that the athletes of today, are the leaders of tomorrow's community.

It would be illogical to say that all athletes are liars, just as it would be irrational to conceive that all politicians are liars. But our youth sports are laying a good deceptive foundation.

Maybe it would be feasible to try and eliminate the fib-for-victory on the lower levels. Teach the young athletes to be truthful when questioned by an official in a ballgame, even if it may cost a win.

Now that doesn't mean that a third sacker missing a tag has to offer the information to the big boy in blue. And the Pop Warner halfback who stepped out of bounds on the 32 on his way to a touchdown shouldn't just stop. But it takes a man to admit the truth and maybe a truthful answer to an official would be a good start in the building of the character of that man.

Not only would such a policy help the official call a much more equitable game, but it would teach a young ballplayer more than just how to catch ground balls and glory in victory.

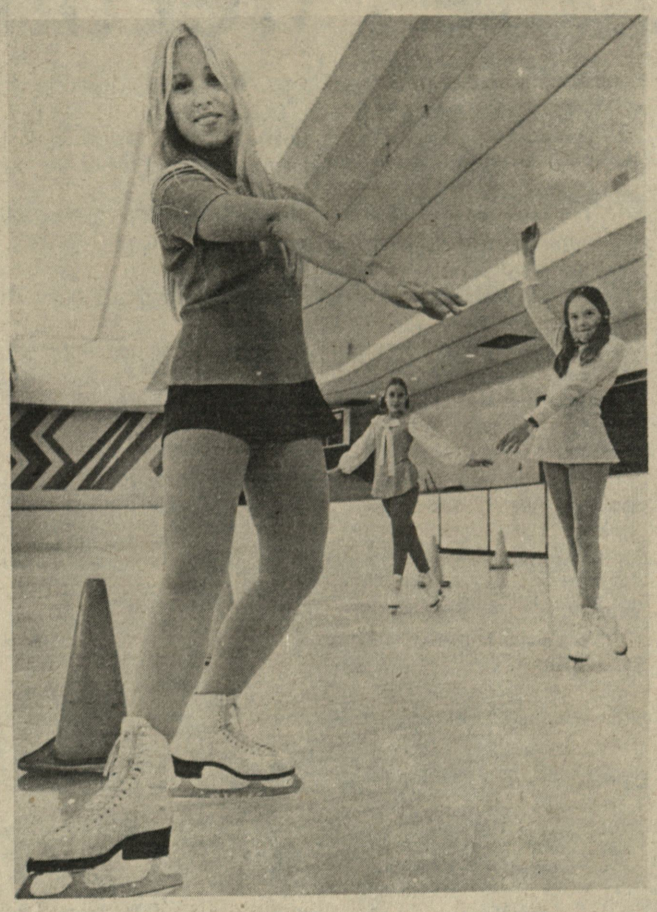
It could teach him that the sun doesn't rise with victory and fall with defeat. It could teach him to strive for honesty at the same time he is striving for victory. It could teach him tolerance, if others would follow his truthful lead.

There's no way to change those athletes already molded. I am one of the old school athletes who would keep his mouth shut at third when the runner was called out after sliding under his glove. There's no way to change a guy like that.

But if we can reach the young people and teach them truthfulness in sports, maybe everyone could have a little more trust in his fellow man.

So don't be surprised in the future if, when at a youth athletic event, you see both teams and all coaches repeat the oath of honesty before the game instead of standing habitually for the Star Spangled Banner, but that's a whole new story.

Sore feet, ankles possible side-effect of Project HOPE fund raiser



Blistered feet and sore ankles are sure to be some of the main side-effects when skaters around the Santa Clara valley take to the ice in an effort to raise money for Project HOPE Sunday.

The skaters will be going around and around three different ice arenas for a scheduled 21 consecutive hours in hopes of raising at least $30,000 for the internationally known health program, Project HOPE.

The Skatathon will start Sunday at 1 a.m. and last until 10 p.m. The three rinks that will participate are the Eastridge ice arena in San Jose's Eastridge shopping center, the Southland ice arena in Hayward and the Sun Valley ice arena in Concord.

The Skatathon will raise money for Project HOPE by having skaters obtain sponsors who pledge to give stated amounts of money to project HOPE for every 25 minute skating period skated by the entrant.

Robert Thornell, president of the Mission Valley ice skating club, expects the average time skated to be from five to six hours.

ICE BEAUTIES — These three young lovelies (at left) will be among the many skaters this Sunday who will be skating to raise money for Project HOPE in the 21 hour Skatathon. The three girls (l-r) Diane Romanowsky, Kathleen Callan and Holly Pearson, will be skating at the Eastridge rink.

Warriors prep for SJCC camp

Summer's kinks will be fall's aches when coach Alvin Attles and the Warrior basketball team convene at San Jose city college for the opening of the 1973-74 training camp.

General manager Bob Feerick announced recently the team will begin preparation for the six-game pre-season and 82-game regular season schedule in the south bay city, Wednesday, September 11.

At the same time, ticket manager Lou Colla revealed that tickets for the pre-season doubleheader (Warriors versus Los Angeles; Portland versus Seattle) Saturday, September 29, would go on sale September 4. Tickets for the regular season home opener October 13 against Milwaukee will be available September 15.

NASCAR at Seca

Cars will be roaring again around the 1.9 mile asphalt circuit August 25 and 26 at the Laguna Seca raceway. But they won't be the normal formula or Can-Am machines that usually speed through the Seca turns.

The National Association of Stock Car Auto Racing will put on their first ever sanctioned show at the Monterey raceway in the Tuborg Classic.

The Sports Car Racing Association of the Monterey Peninsula (SCRAMP) is promoting the event with a $19,925 purse on the line.

Practice and time trials will begin Saturday, August 25. On Sunday there will be a 50 mile (27 lap) consolation race and the 150 mile (79 lap) main event.

Gates open at 8 a.m. Saturday and 7 a.m. Sunday. The main event will begin at 1 p.m. Sunday.

Advance tickets for the NASCAR race are available at all Macy's, Sears and Ticketron outlets. Ticket prices are $6 for a two day pass, $5 for Sunday and $4 for students.

Jamboree kicks-off '73

Forty-eight Police athletic league youth football teams will converge at the PAL stadium next weekend to kick off the 1973 season with their annual football jamboree.

The Midget division will open the jamboree Friday, August 31, at 7:30 p.m. The Pee Wees will take the field Saturday at 5:30 p.m. and the Junior Bantams will compete at 7:30 p.m. Sunday the Junior Midgets will play starting at 11 a.m.

Teams from San Jose, Milpitas, Cupertino, Los Gatos, Saratoga, Campbell and Santa Clara will all play in the season's inaugural event. Each team will play a quarter.

Sports Quiz

1. Which major league umpire was once a pitcher for both the Kansas City Athletics and the New York Yankees?
   a) Bill Kunkel
   b) Art Frantz
   c) Bill Haller
   d) Nestor Chylak

2. Which major leaguer recently tied Dick Littlefield's record for playing on the most teams with 10?
   a) Wayne Granger
   b) Chris Short
   c) Bob Miller
   d) Eddie Fisher

3. Al Kaline won the AL batting championship in his first year in the majors. Has he ever won it since? Yes or No.

4. Only two players have ever won the triple crown twice. The first one to do it was Rogers Hornsby. Who was the other?
   a) Frank Robinson
   b) Chuck Klein
   c) Joe Medwick
   d) Ted Williams

5. Who holds the American league record for most pinch-hits in a season with 24?
   a) Smokey Burgess
   b) Dave Philley
   c) Bob Cerv
   d) John Blanchard

Answers: 1-a, 2-c, 3-No, 4-d, 5-b.

'Cats' may be answer

Meat prices getting fi$hy

By DAVE MENDONCA

Something smells fishy in every supermarket I enter lately. And it isn't the fish—it's the meat!

I noticed some prices in a local store the other day—$2.43 a pound for rib steak, $3.29 a pound for filet mignon, $3.10 a pound for the center cut of pork chops, and $1.64 a pound for chicken drumsticks. I even saw a steak for $5.23!

And a little sign behind the meat reads: "Ground Meat: Three pounds per customer, please. Thank-you."

Frustrated? Dismayed? Angered? Hungry? Well then fight back! For just five dollars you can eat sweet tasting catfish and other California warm water fish for an entire year.

The five dollars is for a fishing license which will last you until the end of the year. And during that time you can be eating sweet catfish, tender trout and succulent striped bass.

The department of fish and game in Long Beach has come up with a pamphlet to help the consumer battle the meat prices. It's entitled "Twenty-one Ways to Prepare Catfish" and it's free to the public.

The booklet is available by writing to: "Catfish Recipes," 350 Golden Shore, Long Beach, Calif. (90802).

The pamphlets were ready to mail August 3 and, by last Friday, the DFG already had over 2,000 requests for the booklets.

But don't worry about them running out. "We'll continue to supply them until the requests die down," said Robert L. Young, spokesman for the department.

And it doesn't appear as though they'll be dying down all that soon. "Today (last Friday) we had our largest mail request since we've started sending them," Young noted.

The booklets aren't done fancy in any way. "We ditto them off and they don't have any pictures, just good information," Young said. But they do have clever names for some of the recipes.

"Most of the recipes are named after people who submitted them," Young said. Among the titles were "The Colonel's Favorite", "Laura's Blue Cheese Broiled Steaks" and "Mother Hubbard's Secret", which is sure to be a favorite with the man in the family. Part of the recipe calls for beer and ale—the other part calls for catfish.

Catfish are one of the most plentiful warm water fish in California. In fact, that's one of the reasons the department decided to print the booklet.

"We didn't feel the catfish were being utilized enough," Young said. But with the meat costs soaring, catfish may find themselves on the verge of extinction before long.

Actually, extinction from too many fishermen catching their limits isn't very likely. The department's Imperial Valley warm water hatchery bred over 500,000 cats this year.

And speaking of limits, the legal limit in the northern part of the state is 20 catfish a day. For other warm water limits on fish consult the 1973 California Sport Fishing Regulations, which you may obtain by writing to the department of fish and game.

"Catfish are all over California," Young notes. "They like warm water, so you won't find them in very high elevations."

There are six varieties of the whiskered swimmer. They are channel, flathead, white, brown, black and yellow.

"The channel catfish is one of the best tasting," contends Young. And they get to be good sized. According to Young, the state record for a channel cat is 41 pounds.

"The flathead is the biggest catfish we have," said Young. In California they grow to be 45-plus pounds. In the Mississippi river they grow to be 100-plus pounds.

California's Colorado river is a good place to go angling for the flathead.

According to Young, the white and brown cats are also good eating and may be caught in many rivers, lakes and ponds.

A good game fish, cats usually go for bait that has an odor to it. Clams, sardines and such things will usually catch a catfish's fancy, although flatheads prefer live bait.

Catfish are scavengers and usually stay close to the bottom, so it is worth your while to bottom fish when you're out for cats.

A lot of people dislike catching catfish for two main reasons: one, they're ugly, and two, they hard to skin.

Well the fish and game department couldn't change what Mother Nature did but they can offer help for problem number two.

A description of how to skin cats the easy way it included in the catfish recipe booklet. "It's an old Indian way," Young said. "You emerge the fish in boiling water for a minute or so and it loosens the skin."

Well it beats pulling it off with pliers.

IN WITH THE GOOD AIR — Sporting a healthy lead over his opponent in a challenge race is Mark Trotter. Trotter went on to win the race and his opponent went on to donate 50 cents to the swim-a-thon for which they both were swimming for recently at the Los Ranchitos Cabana club. All money earned on the day went to paying for swim lanes and racing lines.

M-C falls in finals

Christmas came early for Fullerton's all-star bobby sox team at the recent National minor division tournament held at Buena Park.

Fullerton capitalized on 13 Moreland-Campbell gifts (errors) to rout the locals 12-0 in the championship game.

Gail Patron hurled a fine four hitter for M-C, but her defense failed her. All 12 Fullerton runs were unearned. Full details of M-C's games at Buena Park will be included in next week's issue of the Campbell Press.

Cars crash for survival, $1000 in fair demo derby

More than 100 drivers will crash cars in a battle of survival — and for $1,000 in prize money — as closing day highlight of the Santa Clara county fair in San Jose at 3 p.m. Sunday, August 26.

Advance registration of drivers for the fair's 12th annual destruction derby is comparable to the 1972 signup. Last year 156 cars were entered with Ed Ercolini, veteran San Jose race driver, winning top prize for his four-man team.

While Ercolini picked up $500 for his team last year, he will be crashing for that amount for himself alone this year, the former team event now changed to individual driver competition. Second and third places still win $400 and $100.

Officials announced that the action will be in 15-minute periods again this year, with the final round continuing until just one car remains moving. Best cars are transferred from each of the five heats to the finale, so the best machines take part in the winning action. Officials' decisions are final.

Ercolini's bid for a repeat victory will be challenged by former winners, including Joe Reyes of Stockton, only three-time winner at the San Jose fairgrounds, claiming the title in 1968-69-70, and Ernie Rose of Santa Clara, 1965 winner and second last year.

Last year's crash action attracted 6,321 spectators. Grandstand seats are $2 for adults and 75 cents for children under 12.

Kaeding on road to title, record

Campbell's Howard Kaeding not only can win the San Jose Speedway NASCAR super modified driving title for his first time ever in 1973, but may establish a new record in doing so.

Kaeding and the remainder of the NASCAR gang went postward Saturday night in the annual "Permatex 50."

Kaeding, the defending California NASCAR champion, won his 12th main event of 1973 and his sixth in succession recently.

That puts the Campbell engineer five wins away from the all time single season main event victory record of 17 set by the retired Marshall Sargent in 1960.

Including the extra long "Permatex 50," there are nine Saturday night programs remaining at San Jose. Therefore if Howard can win one out of every two, he'll tie Sargent's mark.

Kaeding entered the season's 24th show with a commanding lead over Nick Rescino, San Francisco, the defending San Jose title holder, in the battle for this season's crown.

Kaeding now leads Rescino, 1,223 to 1,004, a difference of 219 points.

The remainder of the field is strung out far behind the two pace setters.
